

AdS₅ funnel $\longleftrightarrow$ Λ_σ tower $\longleftrightarrow$ H_5 hypercube: φ^σ connects all three

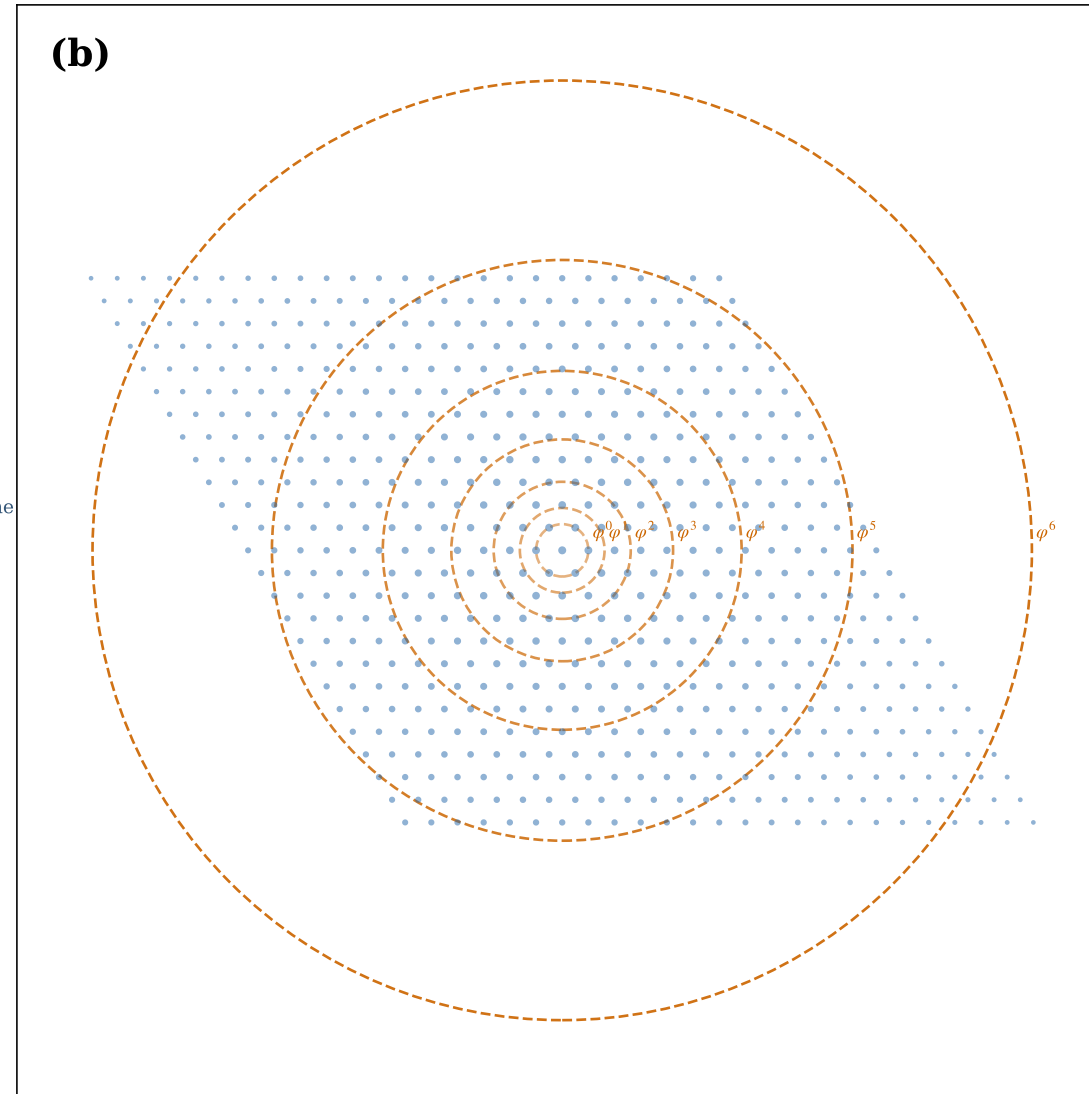

AdS₅: $z = \varphi^\sigma$, $\ell = 1$, $G_N = 1/2$

(a)

$\Lambda_\sigma = \varphi^\sigma \Lambda_{PCF}$ in $\mathbb{C}$

(b)

$H_5 = \{0, 1\}^5$: Hamming = H-S level

(c)
